457 can supplement your pension and help you have a more comfortable retirement.

What is 457?

A 457 deferred compensation plan is a supplemental retirement-savings program that offers a tax-advantaged way to invest for potentially more retirement income. Pretax contributions and any earnings are taxed as ordinary income when withdrawn.*

Why join a 457 plan?

By investing through your employer's 457 deferred comp plan, you may be able to fill a potential gap between what your pension provides and income you may need. Consider this: a 65-year-old couple retiring this year may need \$220,000 (in today's dollars) to cover medical expenses throughout retirement.¹

How do you put money in your account?

That's the easiest part! Your contributions are automatically deducted before taxes from your pay, contributed to your 457 plan account, and then invested as you direct.* Deferred comp is designed for long-term investing. However, if you leave employment with your 457 plan sponsor, you can withdraw money without paying a 10% penalty. Consider that, if you're thinking about early retirement.

What about the risks of investing?

Investing involves market risk, including possible loss of principal. But you also face several other risks. While your Nationwide Retirement Specialist cannot offer investment, tax or legal advice, we'll help you put the various risks into perspective and explain strategies that may help you deal with them.

How do I get started in a 457 plan?
