HYDRAULIC ASSESSMENT REPORT

County Road 1763 Structure at Warrior Creek, 34.27805°, -86.47053°

HUC-12-031601090101

A physical and operational condition assessment was performed for the referenced site by the Cullman County Road Department personnel and reviewed by Jon Brunner, Cullman County Engineer, June 21, 2023 for the replacement of the drainage structure damaged by the flood event that occurred in 2015, April 2020 and on March 17, 2021.

DRAINAGE AREA AND STREAM

The Warrior Creek is a small perennial stream with a narrow flood plain (FHWA HEC-20). The channel width is approximately 20' and the depth is 12'. The drainage area for the referenced crossing is 2.868 square miles (1835.52 Acres). Attached is a flood frequency relation for this site developed using procedures as described in the USGS Scientific Investigation Report 2020-5032, Magnitude and Frequency of Floods on Small Rural Streams in Alabama.

PREVIOUS DRAINAGE STRUCTURE

The in-place structure was damaged by numerous flood events in the past. The current crossing consisted of 2 steel pipes approximately 8' in diameter and 40' wide. The roadway has washed out in the past due to debris being trapped around the structure.

PROPOSED DRAINAGE STRUCTURE

The structure being proposed is a steel beam concrete deck bridge single span total of 22' in length 26' wide. Approximately 14' over the natural stream bed is proposed to replace the structure. The change in length and height to remove the stream obstruction is to allow debris to travel down the stream bed naturally and prevent the roadbed from washing out. Approximately 210 CY of crusher run/ commercial material will be placed at the structure to return the roadway profile.

DOWNSTREAM IMPACT

The replacement structure will provide an opening and conveyance equal or greater than the damaged structure. No stream crossings or adjacent structures exist along the Warrior Creek. The site is located in a special hazard zone.

Sincerely,

A handwritten signature in black ink, appearing to read "Jon Brunner", with a long horizontal flourish extending to the right.

Jon Brunner, P.E.
